

Drills

Drill Station: Section 1.4

1. Simplify the following expression. $65 \div (-5) + (-28) \div (-7)$ Sec: 1.4	2. Evaluate the expression. $(x + y)^2$ when $x = -3, y = 14$ Sec: 1.4	3. In the following exercises, multiply. $-3 \cdot 9$ Sec: 1.4
4. Compute the new balance in Reymonte's checking account after the deposit. Show your work. $-49 + 281$ Sec: 1.4	5. Simplify the following expression. $26 - 3(2 - 7)$ Sec: 1.4	6. Evaluate the expression. $p + q$ when $p = -9, q = 17$ Sec: 1.4
7. Simplify the following expression. $(-4)^2 - 32 \div (12 - 4)$ Sec: 1.4	8. Simplify the following expression. $(8 - 11)(9 - 12)$ Sec: 1.4	9. Simplify the following expression. -6^2 Sec: 1.4
