

Drill Station: Section 1.9

Properties of Reals

1. Use the distributive property to simplify the following expression. $16 - 3(y + 8)$ Sec: 1.9	2. In your own words, state the commutative property of addition. Sec: 1.9	3. Use the distributive property to simplify the following expression. $(4y - 1) - (y - 2)$ Sec: 1.9
4. Use the distributive property to simplify the following expression. $22 - (a + 3)$ Sec: 1.9	5. Simplify. $(\frac{3}{4} + \frac{9}{10}m) \div 0$ where $\frac{3}{4} + \frac{9}{10}m \neq 0$ Sec: 1.9	6. Simplify. $(\frac{5}{16}n - \frac{3}{7}) \div 0$ where $\frac{5}{16}n - \frac{3}{7} \neq 0$ Sec: 1.9
7. In the following exercises, simplify. $17(0.25)(4)$ Sec: 1.9	8. In the following exercises, simplify. $12(\frac{5}{6}p)$ Sec: 1.9	9. Use the Properties of Zero to simplify. $\frac{6}{0}$ Sec: 1.9
