

Drill Station: Section 2.1

Solving Equations (Addition and Subtraction)

1. Solve each equation using the Subtraction and Addition Properties of Equality. $p - \frac{2}{5} = \frac{2}{3}$ Sec: 2.1	2. Solve each equation using the Subtraction and Addition Properties of Equality. $y - 7.2 = 5$ Sec: 2.1	3. Translate to an equation and solve. Nine more than x is equal to 52. Sec: 2.1
4. Solve each equation using the Subtraction and Addition Properties of Equality. $p + 2.4 = -9.3$ Sec: 2.1	5. Translate to an equation and solve. The sum of $-9m$ and $10m$ is -95. Sec: 2.1	6. Solve the equation. Show your work. $5(w + 2.2) - 4w = 9.3$ Sec: 2.1
7. Solve the equation. Show your work. $m + 16 - 28 = 5$ Sec: 2.1	8. Solve the equation. Show your work. $9(y - 2) - 8y = -16$ Sec: 2.1	9. Translate to an equation and solve. Three less than y is -19. Sec: 2.1

Drills KEY

Drill Station: Solving Equations (Addition and Subtraction)

1.	2.	3.
4.	5.	6.
7.	8.	9.
